

# General Environmental Incident Summary

**Incident:** 2192      **Date/Time Notice:** 2/7/2014      0840      **DEM Incident No:**

**Responsible Party:** 5th Bomb Wing

**Date Incident:** 2/6/2014      **Time Incident:** 1820      **Duration:**

**County:** Ward      **Twp:** 157      **Rng:** 83      **Sec:** 13      **Qtr:** SW SE SW

**Lat:** 48.41530      **Long:** -101.33370      **Method:** Interpolation from map

**Location Description:** Corner of Peacekeeper Place and Bomber Boulevard on Minot Air Force Base 13 miles north of Minot.

**Submitted By:** Danny Kluck

**Affiliation:**

**Address:** 5 CES/CEIE

445 Peacekeeper Place

**City:** Minot AFB

**State:** ND

**Zip:** 58705

## Received By:

**Contact Person:** Danny Kluck  
201 Summit Drive  
Minot AFB, ND 58705

**Distance Nearest Occupied Building:** 500 Feet

**Type of Incident:** Tank Overflow

**Description of Released Contaminant:** Diesel Fuel

**Volume Spilled:** 40.00 gallons

**Ag Related:** No

**EPA Extremely Hazardous Substance:** No

**Reported to NRC:** Yes

## Cause of Incident:

Fuel contractor was filling above ground storage tank no. 4013 at the military service station and did not hear alarm indicating tank was full and overfilled the tank.

## Risk Evaluation:

None.

**# of Fatalities:** 0      **# of Injuries:** 0      **Affected Medium:** 01 - air

## Potential Environmental Impacts:

Fuel did not reach water. The ground underneath the snow was frozen rock hard preventing the fuel from seeping into the ground.

## Action Taken or Planned:

Snow was cleared from around fuel tank concrete pad and absorbent booms were deployed around fuel tank concrete pad perimeter. Absorbent booms were also placed under the fuel tank to absorb fuel on concrete pad. An inspection of the site showed that fuel did run off of the concrete pad into the snow and there is contaminated snow. The contaminated snow on and around the fuel tank concrete pad will be removed to Bldg 418 where it will be allowed to melt and then will be processed through an oil water separator.

**Wastes Disposal Location:** Contaminated booms were containerized in plastic barrels for disposal

via the base HAZMART. Contaminated snow will be processed through an oil water separator and fuel will be reclaimed.
